PROFESSIONAL EXPERIENCE

Capsitech IT Services Pvt. Ltd.

Jan 2025 – Dec 2025

Software Engineer, Full Stack | Intern → Full-Time

Jodhpur, Rajasthan

- Built and maintained 10+ UI modules for a Compliance Management System in React.js/TypeScript, serving 100+ active users – covering admin dashboards, task workflows, and guided documentation portals.
- Cut API response times by **15%** by optimizing MongoDB queries and database indexes, and refactoring slow backend endpoints in ASP.NET Core – reducing load on the server under peak usage.
- Delivered features end-to-end across the full development lifecycle – from requirements and design to testing and deployment – working in a cross-functional Agile team using Git for version control.

PwC-US Launchpad Programme

Feb 2024 – Jun 2024

Software Development Trainee

Remote

- Selected for a competitive national training program; ranked **Top 100 out of 1,500+ participants** (scored 92/100) in assessments covering Java, responsive web design, and SQL query optimization.

PROJECTS

ClosetOS – Creator Accessory Lifecycle Tracker

Apr 2026 – May 2026

React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT, Zod

- Built a MERN-stack inventory app that replaces scattered notes with a real-time custody log, tracking accessories sent to stylists and PR agencies – complete with item status, overdue alerts, and image uploads to Cloudinary.
- Locked item status changes to a strict one-way flow on the server (e.g., a missing item cannot be loaned out again), protecting data integrity; optimized dashboard filters using a compound database index to speed up search queries.

Job Hunt Automation Pipeline

Jan 2026 – Feb 2026

Google Apps Script, Google Sheets, Gmail API, Automation

- Built an automated job outreach system that reads HR contact details from Google Sheets, generates personalized application emails, and sends targeted job applications with resume attachments.
- Automated daily outreach workflows, contact tracking, and status management, enabling scalable application campaigns while significantly reducing manual effort and repetitive tasks.

Taskify – Full-Stack Task Management Dashboard

Sep 2025 – Oct 2025

React.js, ASP.NET Core, MongoDB, TanStack Query, JWT

- Built a full-stack task management app – React/Vite frontend with an ASP.NET Core backend – supporting 20+ concurrent users with live search, sorting, and priority filters across 100+ tasks.
- Added smart data caching (TanStack Query) that cut unnecessary API calls by **40%**, plus role-based access control so admins and regular users see different views, secured with JWT authentication.
